DON'T BAG GRASS CLIPPINGS

& you'll have a healthy, beautiful lawn!

If you have any questions call the
"DON'T BAG IT" HOTLINE 224.5640

A QUICK CLASS ON
MOWING THE GRASS.

Did You Know?

- Keep your mower blade sharp and cut only grass that is dry.
- During May and June, don't cut more than one inch at a time - set your mower on high.
- Cross-cut your lawn to dispense clippings in different directions. Your lawn will stay greener and grow more vigorously.
- Leaving grass clippings on your lawn can generate up to 25% of your lawn's total fertilizer needs for a whole year.
- Leaving grass clippings on your lawn conserves water by protecting the soil from hot sun and reducing evaporation.
- Grass clippings account for 75% of total yard waste.
- If you don't bag your clippings, you won't have to stop to empty your bag every few minutes.

YOU DON'T NEED A NEW LAWN MOWER. Your existing mower should be just fine as long as you keep the blade sharp.
